

SJVN REIA – Integrated Billing & Payment Workflow

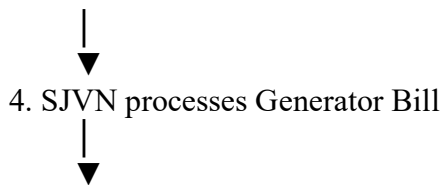

This document consolidates all major workflows derived from the provisions contained in PSA and PPA.

A. SJVN REIA Billing Workflow

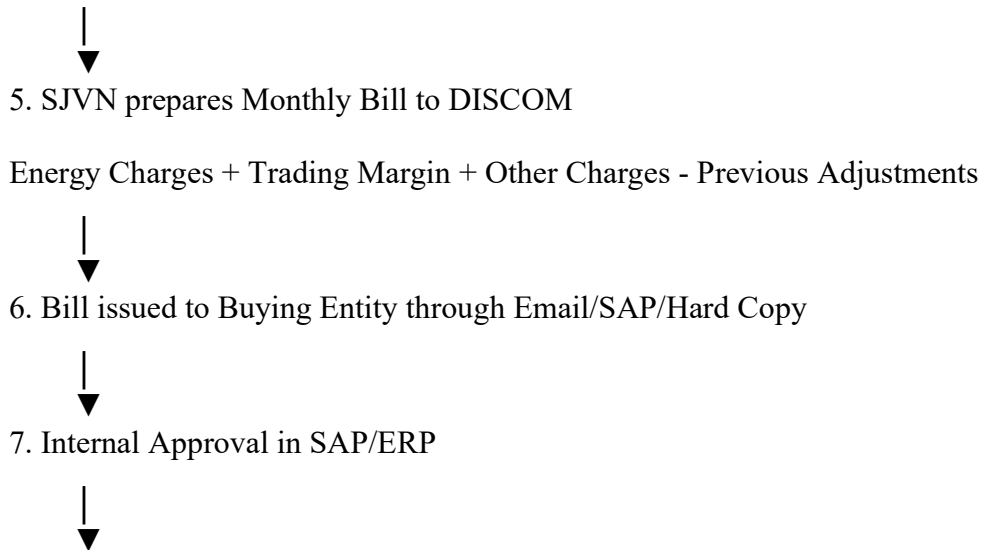

SJVN REIA BILL VERIFICATION

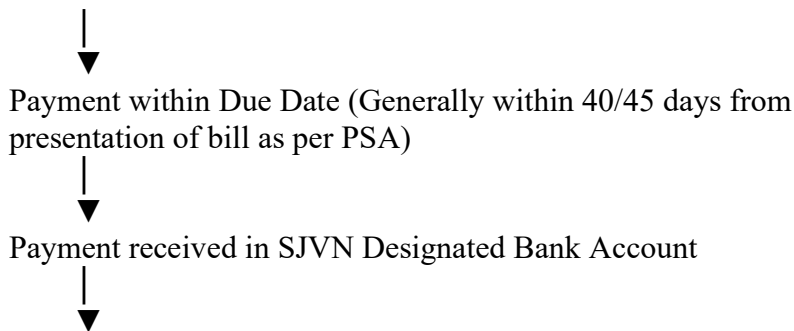

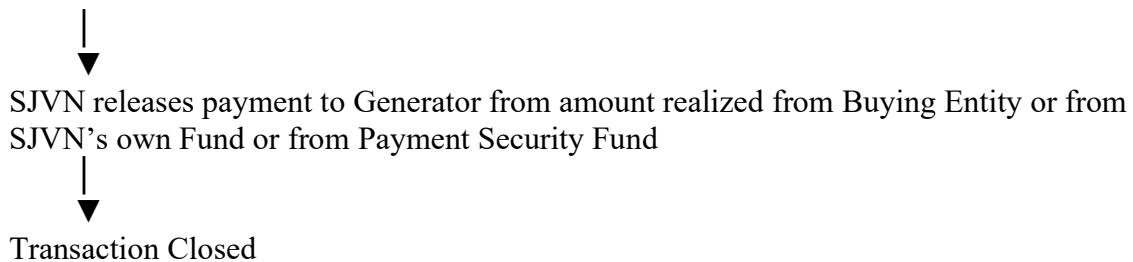

BACK-TO-BACK BILLING TO BUYING ENTITY

PAYMENT BY BUYING ENTITY

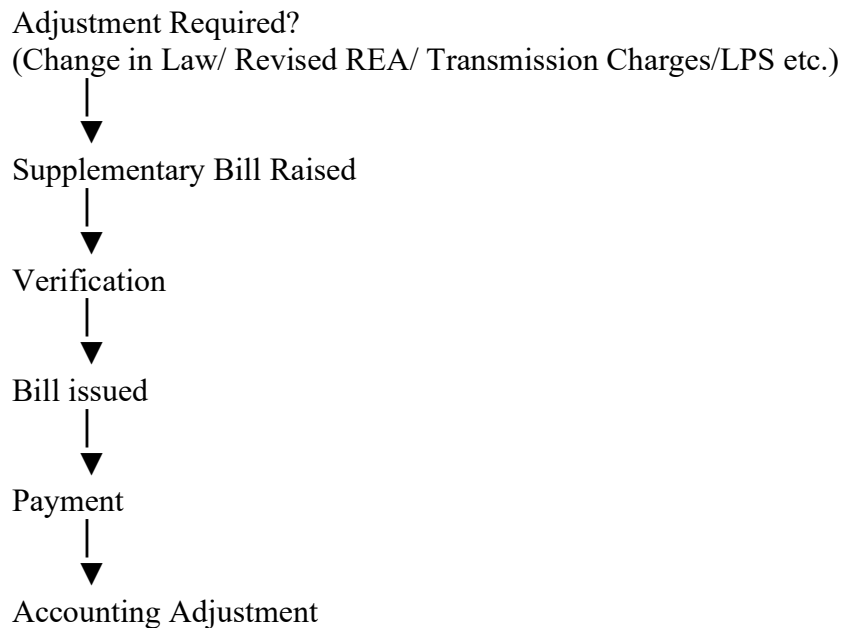

PAYMENT TO GENERATOR

Responsibility Matix for Monthly Billing Process of REIA

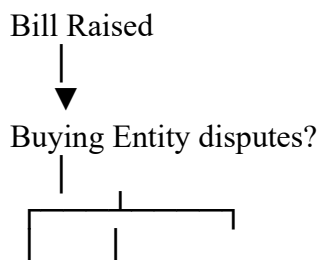

Step	Activity	Responsibility
1	REA/SEA issued	RLDC/SLDC/RPC
2	Generator raises Monthly Bill	Generator
3	Bill scrutiny	SJVN REIA
4	Verification with REA/RLDC	SJVN
5	SAP Invoice Processing	SJVN
6	Bill to Buying Entity	SJVN
7	Payment by Buying Entity	DISCOM/Buying Utility
8	Payment to Generator	SJVN
9	Monthly Reconciliation	SJVN, Buying Entities & Generator

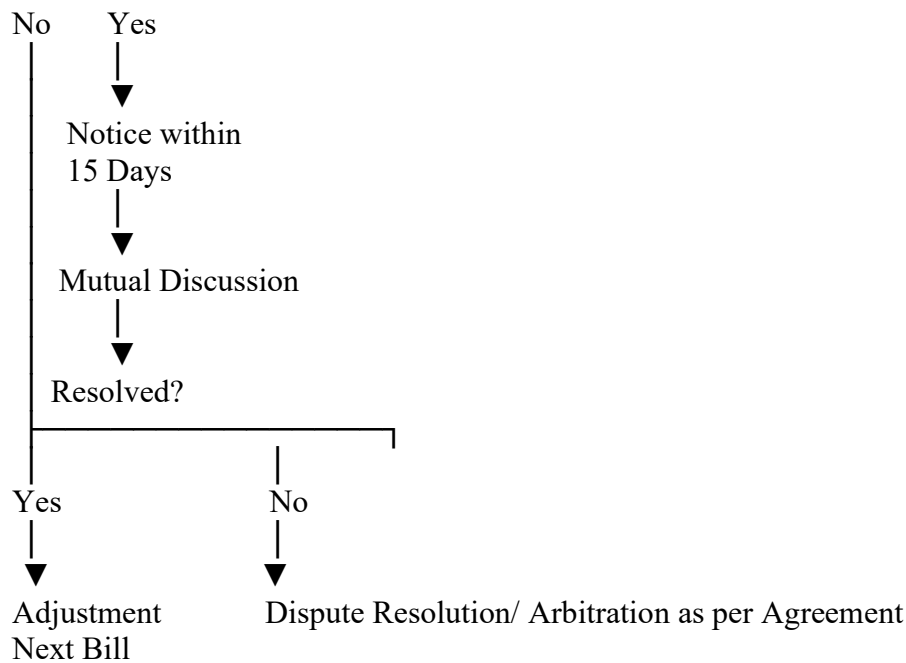

B. Supplementary Billing Workflow

The agreements permit supplementary bills for changes in law, revisions in energy accounts, and other specified adjustments.

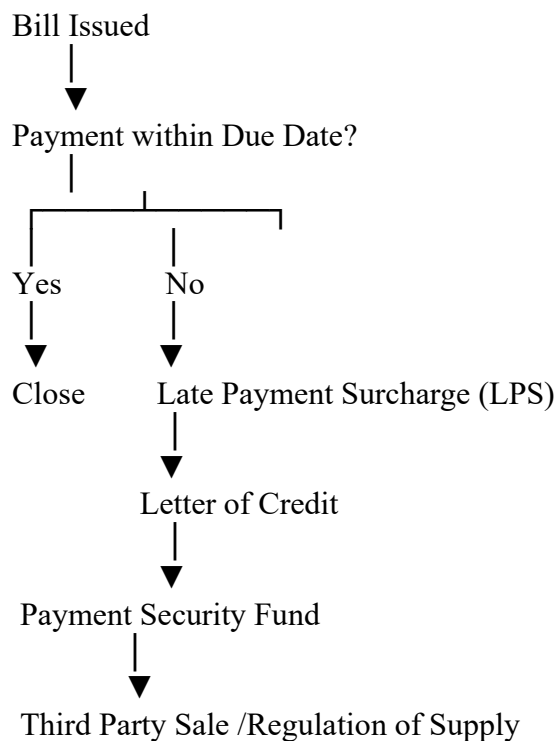

C. Bill Dispute Workflow

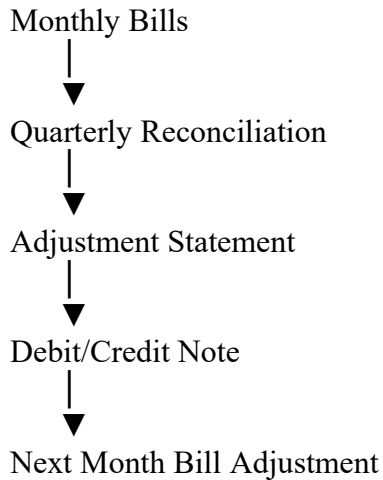

The PSA requires undisputed amounts to be paid even if a dispute exists, with a structured dispute notice and resolution mechanism.

D. Payment Delay Workflow

The agreements provide for Late Payment Surcharge (LPS), invocation of the Letter of Credit, use of Payment Security Fund where applicable, and regulation/diversion of supply in case of persistent payment default.

E. Quarterly/Annual Reconciliation

Quarterly and annual reconciliations are carried out to account for energy account revisions, tariff adjustments, rebates, LPS, and other agreed adjustments.

F. CERC Compliance

The REIA team prepares and submit the monthly and annual CERC Form-IV compliance.

End-to-End Process Summary

Generator → REA → Generator Bill → SJVN Verification → SAP Processing → SJVN Bill to Buying Entity → Payment by Buying Entity → Payment to Generator → Reconciliation → Supplementary Bills (if any) → Closure
