

Power Trading – End-to-End Workflow (PT & BD Team)

Overview

The PT & BD team executes power trading transactions through two major transaction types:

1. Bilateral Transactions

2. Power Exchange Transactions.

The team is responsible for bidding, scheduling, settlement, billing, reconciliation, regulatory compliance, and Renewable Energy Certificate (REC) management.

Common Workflow (Applicable to Both Transaction Types)

1. Energy quantum availability is received from the Seller/Buyer.
↓
2. The available quantum and schedule are shared with the Buyer/Seller for consent.
↓
3. Upon receipt of Buyer/Seller approval, confirmation is communicated to the Seller/Buyer.
↓
4. The transaction is finalized for execution.

1. Bilateral Transaction Workflow

1. Format-D is prepared through the SJVN-ISET software with 15-minute block-wise scheduling details.
↓
2. Format-D is shared with Seller and Buyer for review and concurrence.
↓
3. Contract is created on the NOAR Portal and shared with the Seller.
↓
4. Seller approval is obtained and the application is submitted on the NOAR Portal.

5. NOAR charges are paid and follow-up is carried out with NLDC for approval.

6. Upon approval, energy schedules are punched and implemented.

7. Power is delivered as per approved schedules.

8. PT & BD monitors deviations, schedule adherence, and transaction execution.

9. Recharge the NOAR wallet to facilitate the payment of Open Access charges, including ISTS charges, RLDC charges, and application charges payable to Grid India and CTUIL.

2. Power Exchange Transaction Workflow

1. Bids are prepared in the SJVN-ISET platform.

2. Bids are transmitted from SJVN-ISET to the Power Exchange Portal through API integration.

3. The Exchange performs market clearing and price discovery.

4. Cleared quantities and prices are received from the Exchange.

5. Schedules are generated and submitted to the concerned Load Dispatch Centre.

6. After approval, energy is scheduled and delivered.

3. Billing and Settlement

1. The PT & BD team currently generates Energy Settlement and Open Access invoices through the SJVN-ISET software.

Amr

2. Coordination with Sellers, Buyers, and Finance Department for payments and receipts. Timely settlement and closure of transactions.

4. Reconciliation Activities

- ❖ The PT & BD team currently performs monthly commercial, energy, and financial reconciliation.

5. REC Management For CSPP

1. Collection of JMR data from CSPP.
↓
2. Application submission on NLDC REC Registry Portal.
↓
3. Upload of supporting documents and follow-up with SLDC/NLDC.
↓
4. Issuance of RECs and trading through approved platforms.
↓
5. Coordination for payment realization and reconciliation.
↓
6. Upload the IEX obligation report to create and maintain a ledger of REC purchase and sale data.

6.CERC Compliance

- ❖ The PT & BD team prepares and submits the monthly and annual CERC Form-IV compliance reports.

7.Simplified Process Flow

Seller Availability → Buyer Consent → Seller Confirmation → Bilateral/Collective Transaction → Bidding → Scheduling → Approval → Energy Delivery → Billing & Settlement → Reconciliation → REC Management → Regulatory Compliance
